PROFILE

Highly self-driven and flexible software engineer, keen to learn new technologies, seeking an opportunity with a collaborative mission-driven team to make positive impact using code.

WORK EXPERIENCE

SOFTWARE ENGINEER INTERN

Groupmuse August 2018

Core contributor on team of six for React Native app for Groupmuse, a platform with more than a 100K users that organizes classical music house parties hosted in people living rooms every week.

- Designed and created reusable, testable, styled components following atomic design principles using React Native, Redux, Jest, Enzyme and Detox.
- Built a reusable algorithm to track dynamic screen navigation progress through the app.
- Developed a new feature allowing users to RSVP people from their contact list using native modules and REST API calls.
- Implemented ability for the users to add their contact information for event correspondence.
- Completed user account set up flow by implementing five screens from scratch using React and Redux.

FITNESS COACH / STRENGTH TRAINER

Fitness Evolved

January 2012 - January 2018

- Designed strength training programs and classes protocols for all Fitness Evolved clients.
- Mentored all FE trainers and interns, fully on-boarded.
- Oversee client care protocols and customer service experience from start to finish.
- Be a liaison between clients, trainers and CEO.

FITNESS COACH / STRENGTH TRAINER

Berkeley Ironworks

January 2009 - January 2012
